

Overall Status On (New) Schedule

As it has been decided to postpone go-live until december, we have time.

What has been done

We have now gotten the full export including images and can start working with adding multiple images

Things that have been improved based on Douglas feedback

- Navigation
- Home page
- Collection pages
- Product detail pages
- Multiple images per product (in progress)

Focus forward

As we now have more data we will start to enrich products further.

Also we have a introduction to Shopify workshop coming up where we will educate the team.

Focus;

- Product page templates
- Product data (dimensions etc.)
- Collection pages (more inspiration)
- Product detail pages
