# DURANITE®

SCANCOM'S HIGH QUALITY TABLE TOPS

## ABOUT DURANITE®

Duranite® is ScanCom's solution for durable table tops.

Duranite® is made from high quality fibre cement board which is coated with a multi-layer polymer based paint. Duranite® can withstand all weather conditions making it the ideal replacement for natural stone.

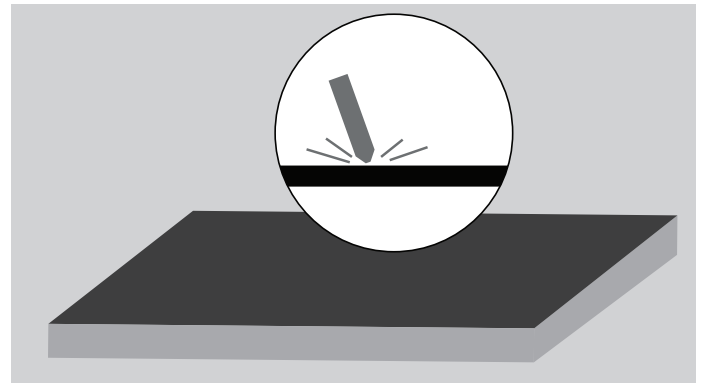

Duranite® is scratch resistant. The quality of the surface can be attributed to a unique hardening process which each table top undergoes in the final stages of coating. This finishing process also contributes to the excellent weather resistance and low maintenance of Duranite® table tops.

Duranite® comes in a range of natural colours and can be custom selected to create an exclusive look for your furniture collection. Also, don't forget to check out ScanCom's new Duranite® Zebano, Wood Grain and Granite ranges.

## FAQ

**1. Can I use Duranite® products outdoors throughout the year and in all types of weather?**

Duranite® is an extremely durable material that has been coated to withstand all types of weather and outdoor environments, all year round.

**2. Will Duranite® colours change overtime?**

Duranite® has been coated with a UV treatment which stabilises the colour from fading.

**3. Is Duranite® safe for the environment?**

Duranite® is safe for the environment and does not use any harmful chemicals when created.

**4. Does Duranite® need special maintenance?**

Duranite® is maintenance free. Should the edge of the Duranite® become scratched or chipped, ScanCom has developed a Duranite® Touch up Kit to help repair.

**5. Do Duranite® products have a warranty?**

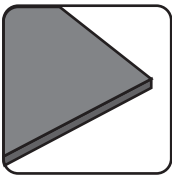

Duranite® products come with a 5 year warranty.

## MAINTENANCE

Duranite® is extremely durable and requires very little maintenance. Should your Duranite® surface become dirty, soap and water should be used to clean it.

Should the edge of your Duranite® table become chipped or damaged, we recommend you use ScanCom's Duranite® Touch Up Kit. ScanCom's Duranite® Touch Up Kit is easily applied to the edge repairing any Duranite® that has been chipped or damaged.

### Duranite® Touch Up Kit

**Step 1:**

Place the table in a cool dry environment. Ensure the edge of the Duranite® is dry, clean and free of dust or grease.

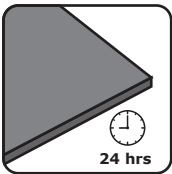

**Step 2:**

Shake the touch up kit stick thoroughly.

**Step 3:**

Apply a thin layer of the touch up kit liquid directly onto the damaged area. Wait for five minutes and then apply a second layer if the first is not sufficient.

**Step 4:**

Leave the table for 24 hours to allow the liquid to fully dry.
