**Table
Collection**

The Arket table collection is made using basic geometrics - radii and linear sections intersect to achieve distinctly intuitive shapes. The aluminum bases have three or four spokes with adjustable feet. The tabletops are made of steel: the tables are thus painted in a solid color and easily customizable and adaptable to the most prestigious of installations.

ARKET

| | Factory | Quantity | Price, End customer |

**Lounger
Collection**

The Podio sun-lounger collection are born from the need to enhance outdoor environments with innovative, contemporary and simple design. The result obtained is quite stunning: the surface dedicated to relaxation turns out to be clean and floating, suspended in mid-air, minimizing volumes. Steel, aluminum and techno-polymer, used in a correct balance thanks to state-of-the-art technology, have created products of extreme lightness and manageability, as well as being supremely resistant and durable. These sun-beds are equipped with backrests adjustable to 5 positions and practical castors for easy transport; Podio also stack compactly, which helps in terms of transport as well as reducing the necessary storage space.

The Podio sun-bed uses synthetic fiber on the relaxation surface, consisting of a weave of polyester fibers covered in PVC, able to withstand compression stress, tears, atmospheric agents, swimming pool chlorine, salt and UV rays. This material, thanks to its micro-holes, is breathable and allows moisture and water to escape without creating stagnant deposits.
